Date: 13/12/2023

Time: 0900 hrs.

Incident Description

A contractor employee sustained a superficial laceration on her index finger whilst chopping some vegetables.

Preliminary Findings?

- Inattentiveness – the cook was not paying attention whilst chopping vegetables and ended up cutting her finger.
- Risk assessment was adequately done, and risk of cutting was identified.

Body part / Nature of Damage

Left Index Finger

Corrective & Preventative Measures

1. Activity was stopped immediately, and supervisor was notified.
2. The injured was taken to the mine Clinic for further assistance.
3. Workers were briefed on the incident.
4. Workers must always remain vigilant when exerting their tasks.
