

**ENVIRONMENTAL TOPIC FOR MARCH 2023**

**CONSERVE WATER**

**Underground Pipe Leak**

**Unattended Taps**

- Water is essential for day to day running of the Plant.
- Avoid misuse of water by leaving it running from taps and fire hose reels without being monitored.
- Unattended pipe leakages may result in shortage of water needed to drive plant processes.

***Note: Pumping and treatment of water is done at a cost therefore, conserve water at all times***
