

SAFETY TOPIC FOR THE MONTH OF FEBRUARY 2023

ADHERE TO MACHINE GUARDING SAFETY

Note the important tips for machine safety:

- Report defective machine safeguards to your supervisor immediately.
- Guards to be removed by competent person for maintenance & must be put back once work is complete.
- Never remove machine safeguards on equipment.
- All head, tail, drive tension pulleys and feeders shall be adequately guarded at pinch points and the length of the guards shall extend at least 900 mm from the pinch point. (Reg 331 of MQWM act.)
