

SAFETY TOPIC - SEPTEMBER 2023

PRACTICE GOOD HOUSEKEEPING

Observations made:

- It is noted that proper housekeeping does not occur once maintenance has been completed.
- Tools, bolts, and other materials are left in the plant for days.
- Such practices could result in serious incidents to people as they can trip over them.
- Maintenance teams must clean up after completion of works and operations must only accept Plant once they are satisfied that housekeeping has been done.

NB: If materials and equipment is not being used, it must be removed to designated areas.
