

SAFETY TOPIC FOR THE MONTH OF JUNE 2021

KNOW THE BASIC RULES OF A BENCH GRINDER

Bench grinders can cause serious injuries if safety protocols are not adhered to. No one is permitted to use a grinder under these conditions:

- Grinding wheels are damaged or not properly secured.
- Grinder is not provided with substantial, adjustable work rest which shall be securely fixed in position and adjusted to within 3mm from the grinding surface of the wheel.
- Grinder is not provided with transparent unbreakable shield to protect the workers eyes.
- User is not trained to use such machine.
- The grinder should always be isolated when not in use.
